An original idea makes design distinctive
but function makes it work.

UMBROSA

UMBROSA

Umbrosa Unique Shade Design

UNIQUE SHADE DESIGN,
THERE IS NO BETTER
WAY TO DESCRIBE
WHERE UMBROSA
STANDS FOR.

Umbrosa offers stylish and sustainable shade solutions for the residential and the project market.

ALL PRODUCTS ARE DEVELOPED AND PRODUCED IN BELGIUM.

The shade solutions by Umbrosa are a clear statement of both elegance and understated simplicity, and that in combination with a never seen way of ergonomics that puts 'easy to use' to a higher dimension.

Umbrosa chooses very consciously to work with the best international designers and to produce exclusively in Belgium. All of this ensures long lasting shade, year after year. Our umbrella collections are exported to more than 90 countries and are used around the world on the most beautiful terraces and by the most famous hotel groups.

__UX COLLECTION **Versa UX** | Full Black

UMBROSA

UX collection

The UX collection does not follow the standard rules. Each umbrella is a unique combination of color, shape and material, and has ultimate ease of use and perfect ergonomics. The umbrellas refine the look of any outdoor setting: discreet luxury for those looking for that little bit extra.

The UX concepts are designed as a package and are also offered as such. Canopy, frame and umbrella base together create one unique concept.

Umbrosa has 6 UX collections:

- __Versa UX
- __Nano UX
- __Icarus UX
- __Eclisum UX
- __Infina UX
- __Paraflex UX

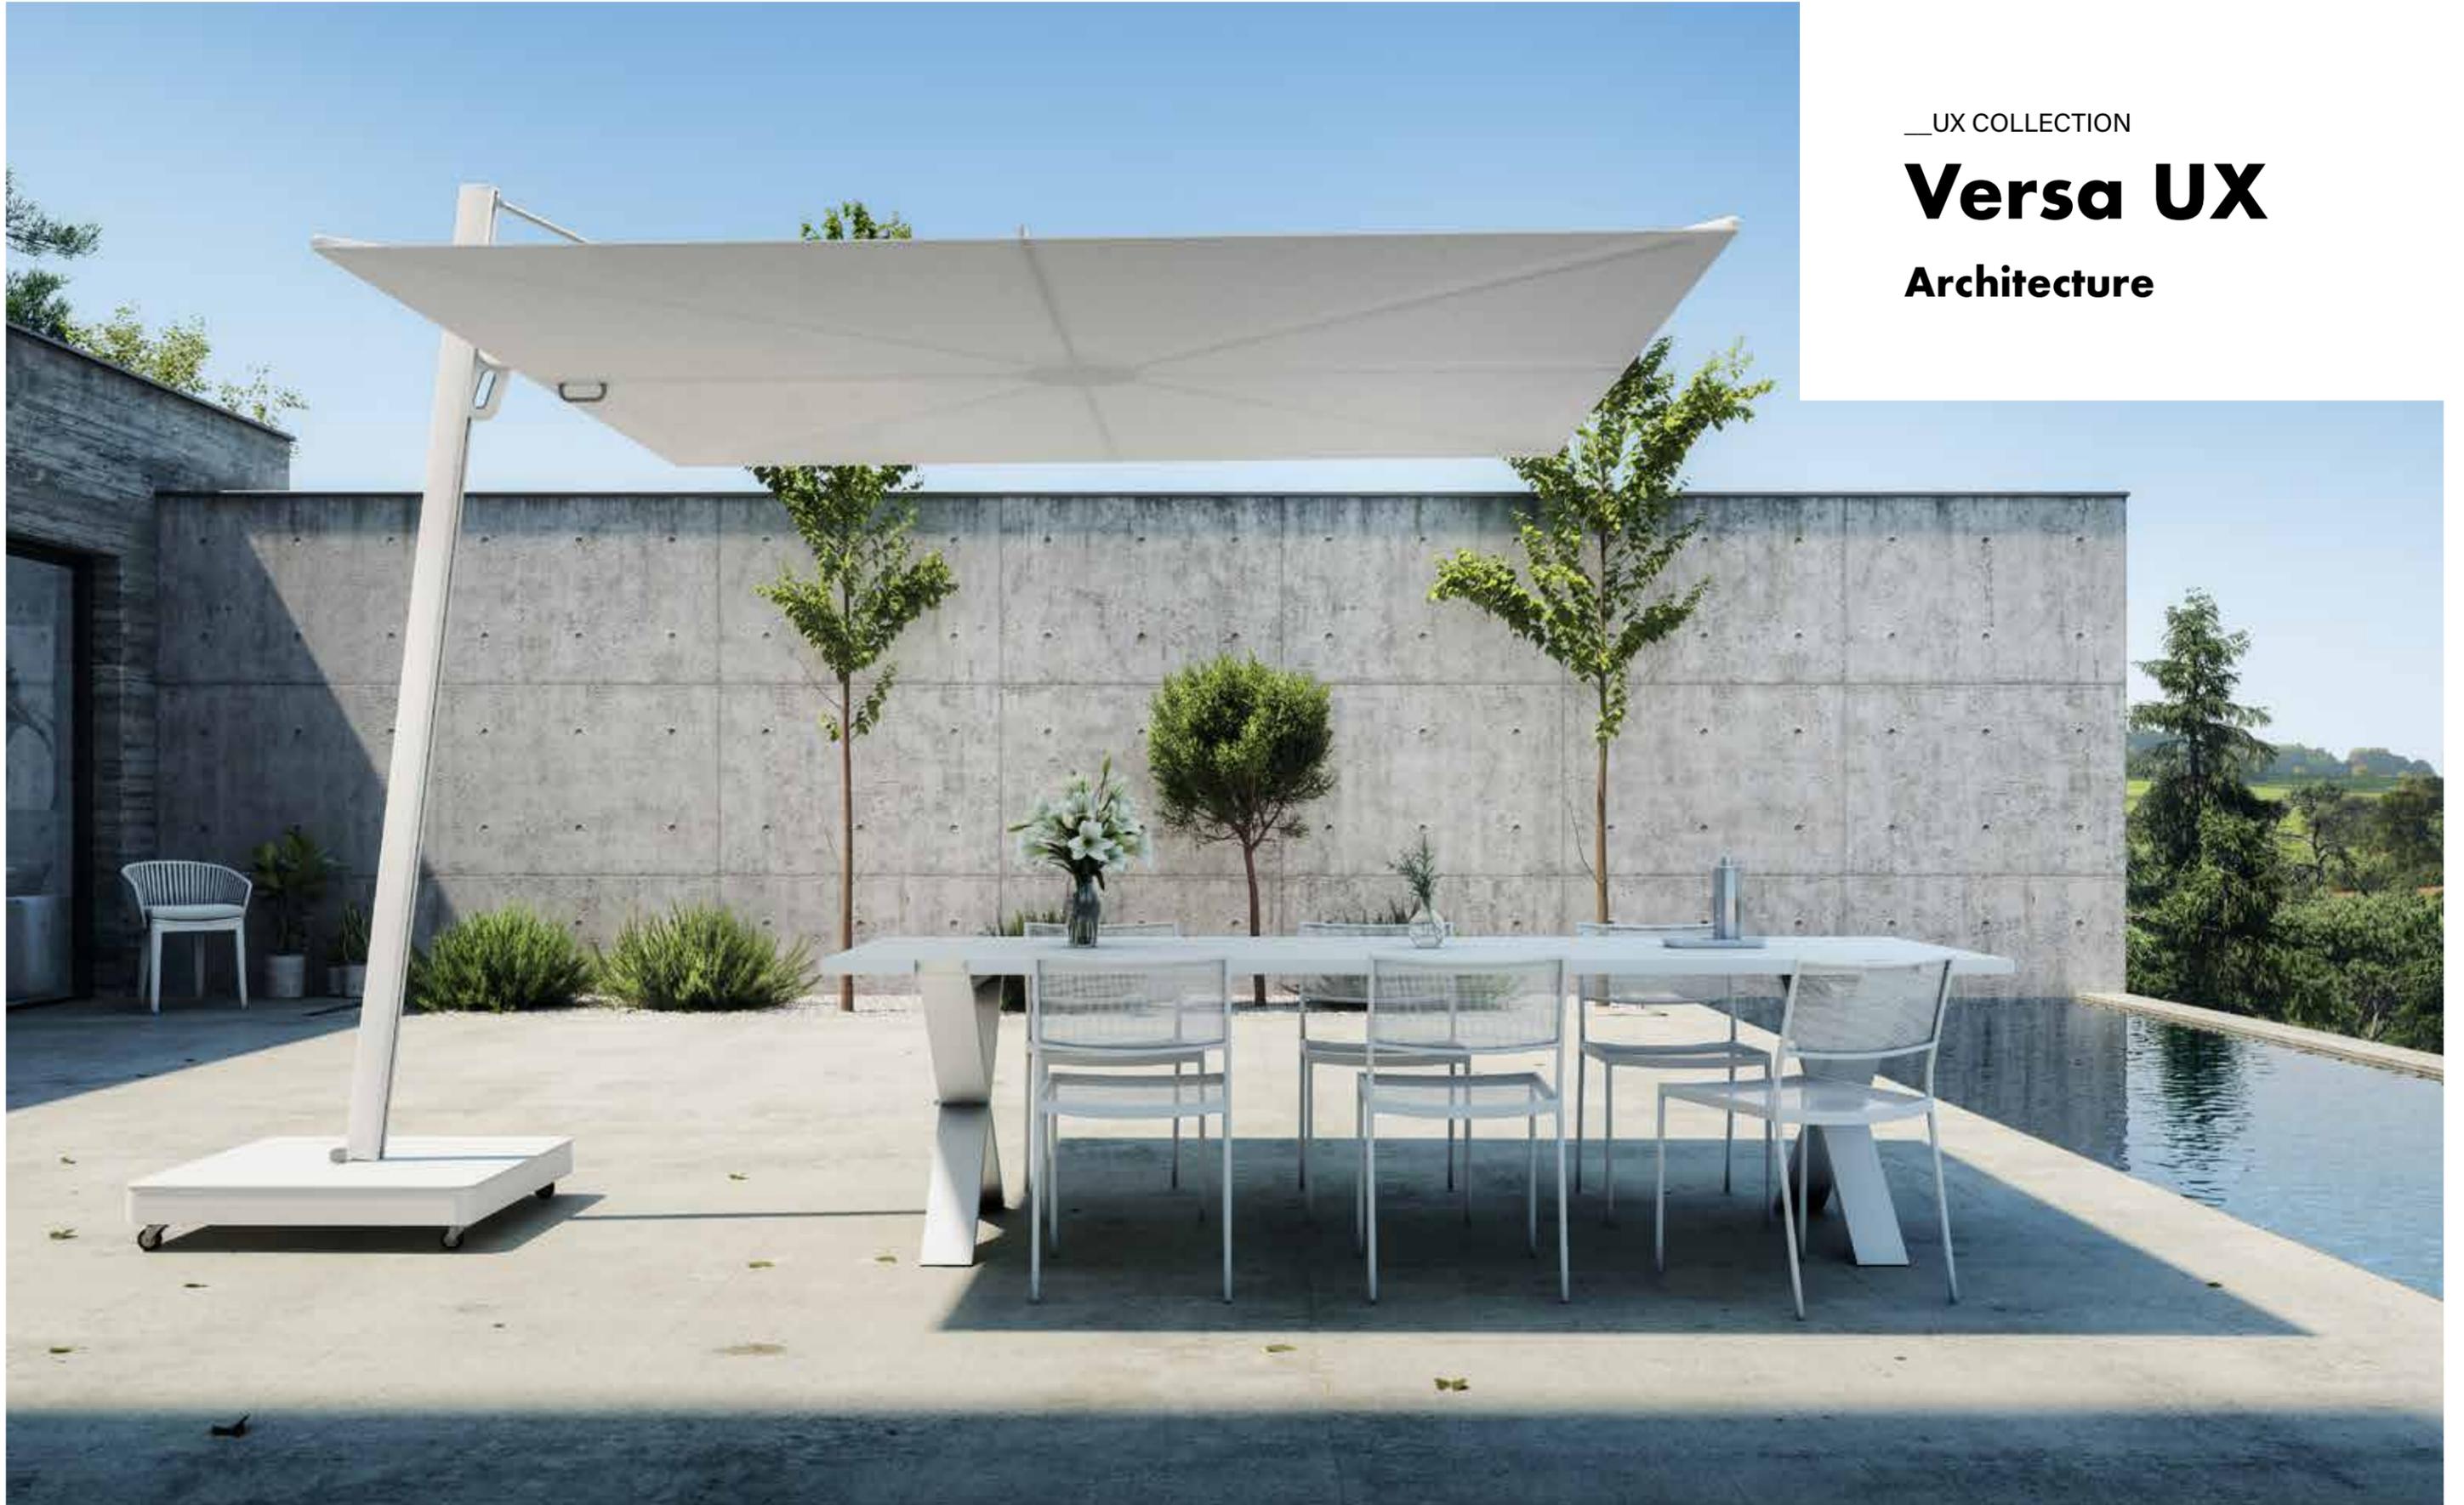

Note: Check the Umbrosa pricelist for the collections available in your country.

UMBROSA TOGETHER WE ARE 1 TEAM AND 1 BIG UMBROSA FAMILY!

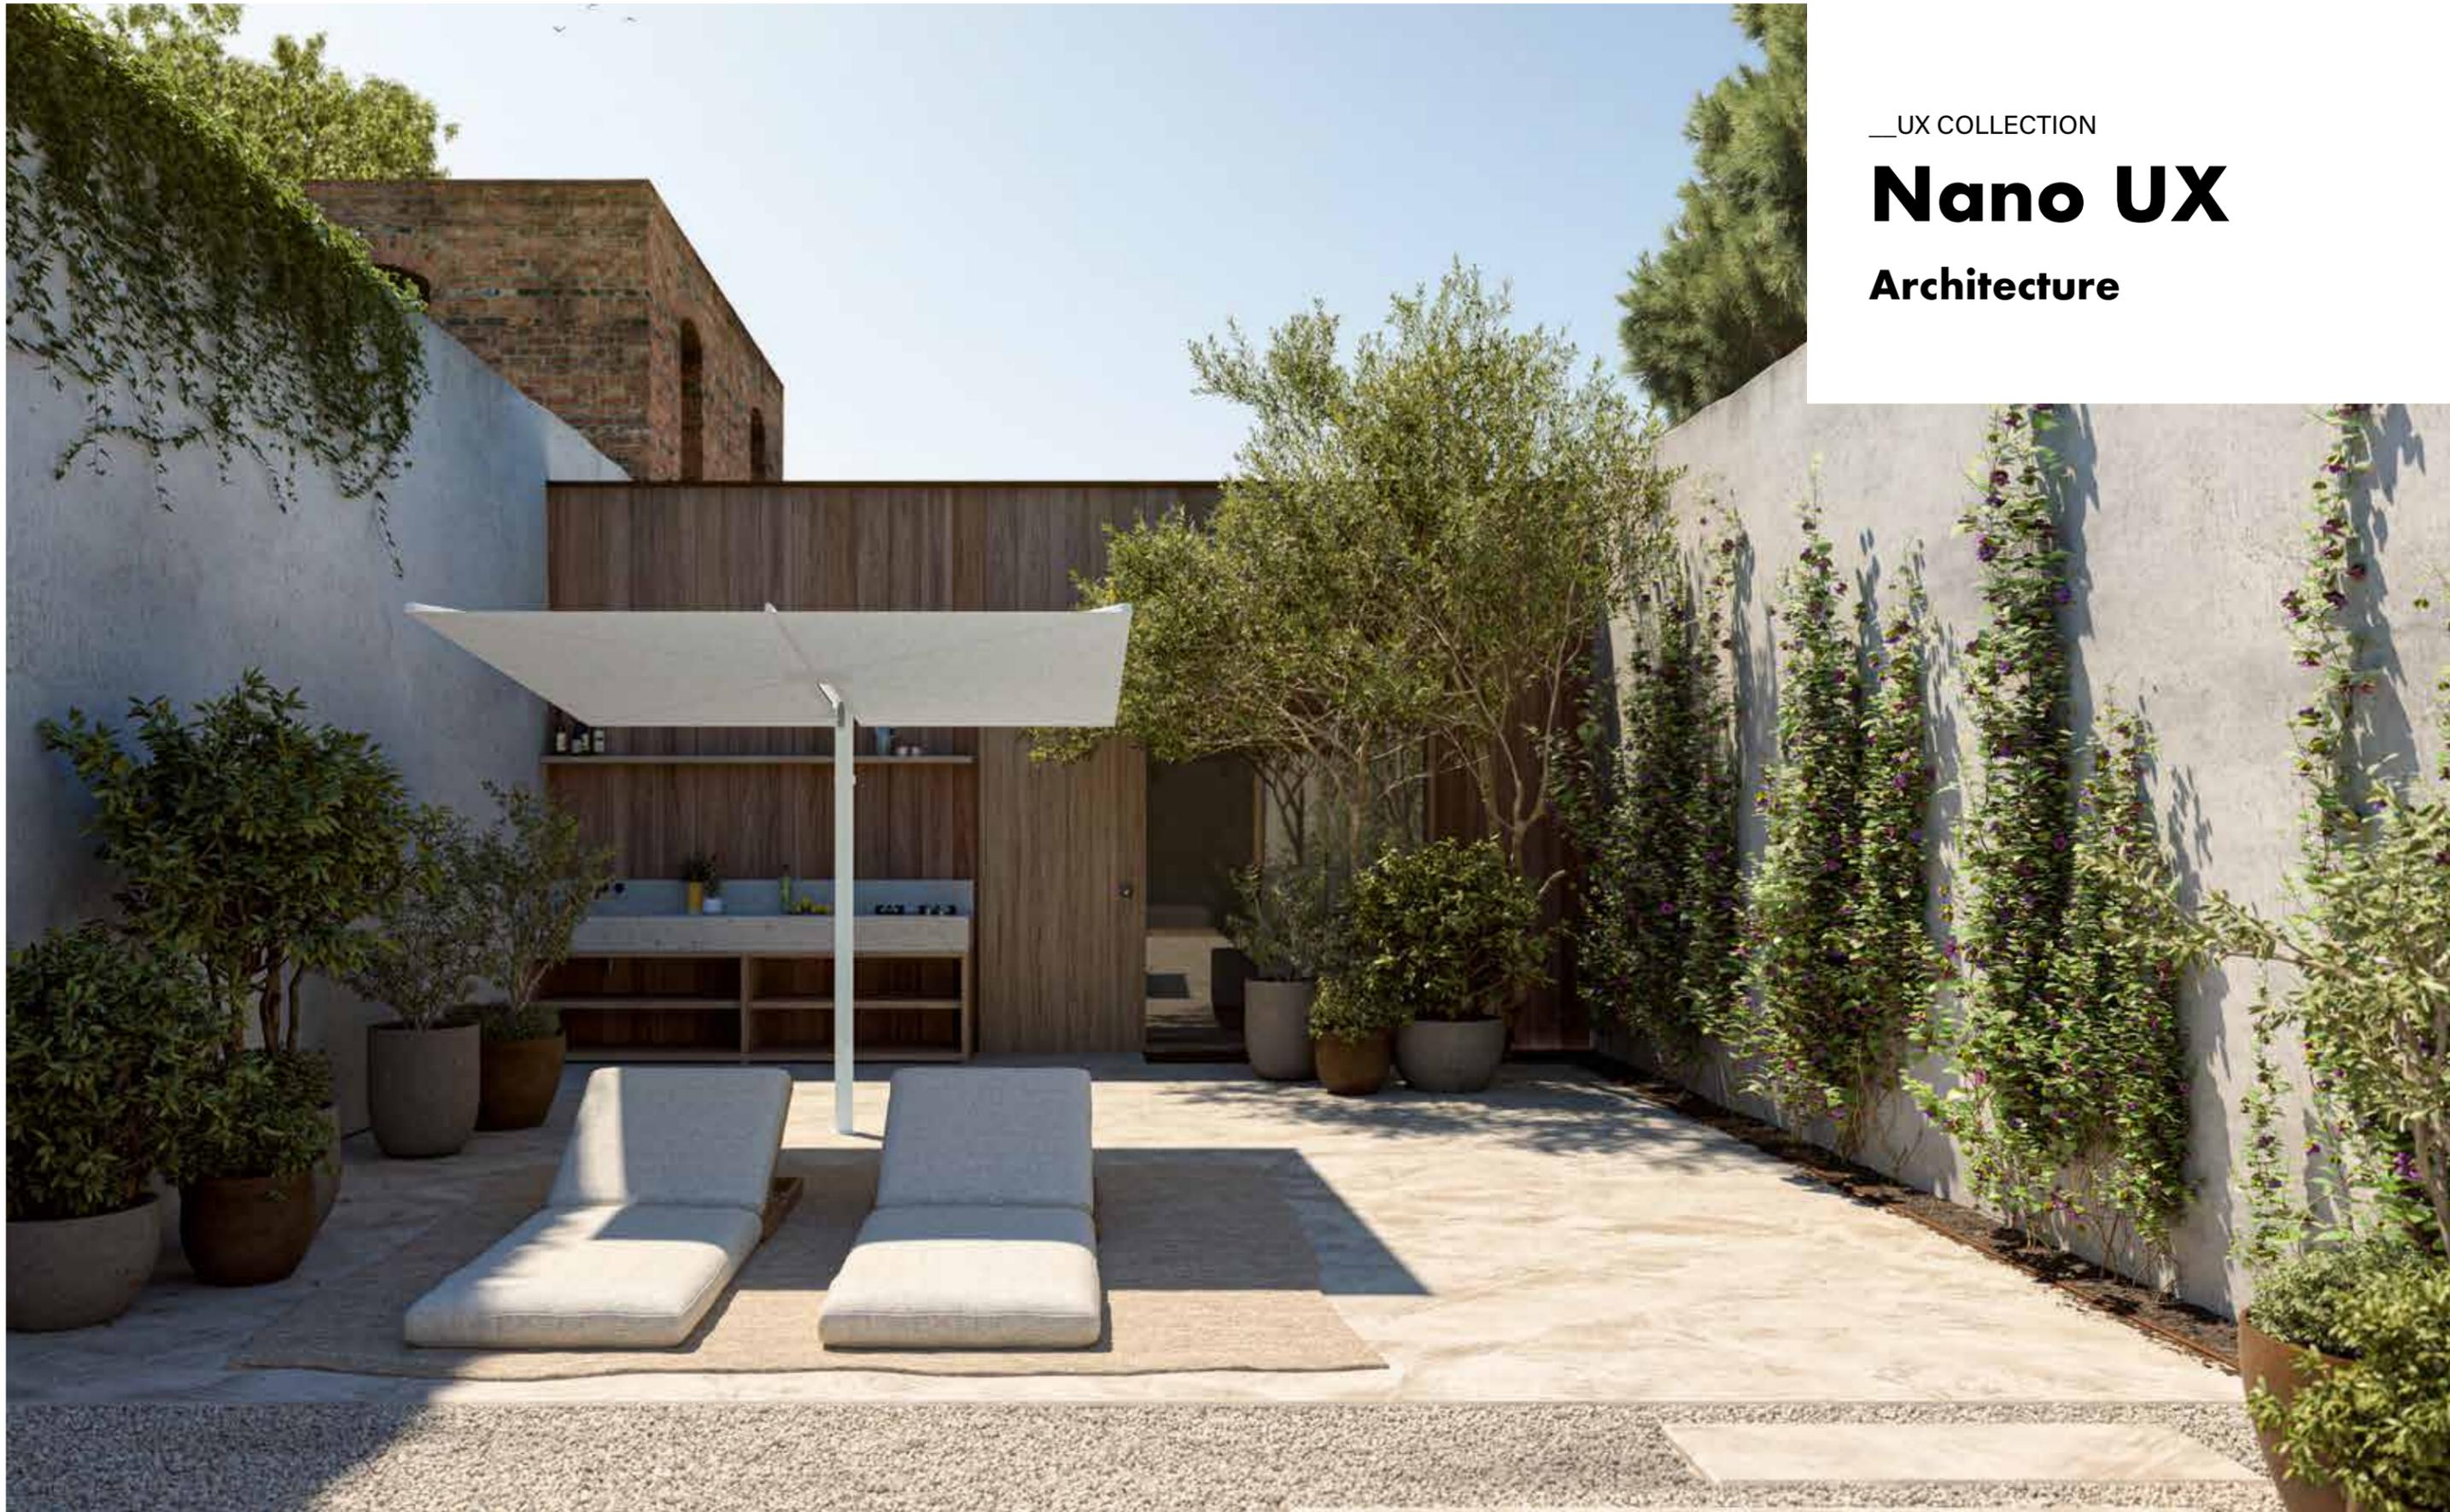

Each Umbrosa product, before it reaches you, has passed through many hands! Our parasols and shade sails are repeatedly submitted to the sharp eyes of our quality controllers during the production process.

The production starts with our **seamstresses**, who check the fabrics and then process them with utmost care into a finished canopy or shade sail. All canopies are hand-stitched one by one in our sewing department.

Our **assembly team** hand-mounts all frames and bases. Our logistics department picks the goods, packs them carefully, and makes sure they get to you safely.

Our **design team** is continuously working on re-thinking existing collections and designing new parasols.

It's all about timeless design and sustainability

The R&D team of Umbrosa develops new products and at the same time constantly seeks to improve the current collections. Sustainability is a verb for us that keeps us busy on a daily basis. **Design trends are important, but timeless design is what we strive for at Umbrosa.**

We are all becoming increasingly aware of climate and sustainability. Umbrosa buys as many components as possible locally in order to shorten the chain, establish good communication and secure reliable quality. The fact that we confection and assemble in Belgium adds to our efforts to reduce our ecological footprint and to increase our supreme quality level. We will not support a throwaway society. Therefore, our products are thoroughly tested and we carry an extensive range of spare parts. We also try to create designs that touch people and that establish an emotional bond that lasts.

Umbrosa is also part of the growing importance of healthier and safer environments with cleaner air. This translates into more organic gardens with lots of flowers, trees and wild plants along with design umbrellas that protect your skin and go hand in hand with the outdoor experience.

The garden has become an extra room to the house, the difference between indoor and outdoor is fading. Now more than ever we search for a feeling of security and cosiness in our gardens.

UMBROSA

Shade sails

Even when larger areas have to be put in the shade, Umbrosa offers an easy solution. Thanks to the ingenious sliding mechanism of Ingenua, you can easily adapt the sail to the circumstances and the environment. The simple lines and modern shapes of Ingenua shade sails are combined with an excellent performance in terms of wind-resistance.

UMBROSA COMPANY

umbrosus, a, um (adi.) 1. Shady, leafy, full of shade, shaded - Umbrosa embodies innovative shade solutions with a young and dynamic appeal. Our umbrella collections exude class, flexibility, and thoughtful design. They ensure protection from the sun in an effortless and stylish manner. At Umbrosa, we make a statement of elegance and simplicity. We collaborate with leading international designers and proudly produce under the label 'Made In Belgium'. Our team of designers and creative minds pays special attention to the unique character and bold creativity of each design.

Quality and sustainability are essential values in our production process, resulting in long-lasting shade year after year. Our umbrella families have become renowned worldwide on the most breathtaking terraces and among the most prestigious hotel groups in over 90 countries. Nature is an endless source of inspiration that constantly stimulates us. Just as trees and plants provide shade in a unique way, we aim to offer shade solutions to our customers in that same distinctive manner.

Umbrosa strives to develop versatile and innovative shade creations that are far removed from the traditional umbrella. As the unique umbrella design brand for both residential and commercial use, Umbrosa offers affordable prices without compromising on style and quality.

TEAM

At Umbrosa, customers experience the perfect combination of flexibility and personal service, typical of a small-scale organization, while enjoying the expertise and reputation of a global player, as evidenced by our numerous international references. Our loyal customers benefit from the advice and guidance of a dedicated contact person, who's full of passion and knowledge and ready to assist them. With our team of 40 people based in Belgium, we master the entire production process, from innovative product development to successful commercialization. We take pride in the fact that all our products, ranging from Paraflex and Ingenua to Icarus, Spectra, Infina, and the UX collection, are manufactured with care and craftsmanship in Belgium: a guarantee of sustainable Belgian quality! April 2022 marks an exciting milestone for Umbrosa! Not only have we expanded our sales activities to the United States, but we are also delivering directly from our brand-new warehouse in Baytown, TX. We can't wait to conquer the American market, which is filled with unprecedented potential for Umbrosa. Get ready, USA, Umbrosa is coming!

VISION AND MISSION STATEMENT

Vision

Umbrosa wants to provide all terraces and gardens around the world with Unique Shade Solutions.

Mission

To manufacture high-end shade solutions in Belgium, that offer the optimal user experience, by designing unique, innovative and sustainable products, that have an impact on outdoor living.

Values

Passion | Communication | Perfection | Personal growth

DESIGNERS

Umbrosa distinguishes itself by a daring design that is both accessible and playful. To obtain this, we call on renowned designers - NG Design, Dirk Wynants, Bundl, Fosfor, Pieter Willemyns, Peter Leleu, Alien Schoenaerts and Tore Bleuzé - each of them has a creative vision and innovative ideas which give a whole new meaning to the concept of a standard umbrella.

MADE IN BELGIUM

All design, development and assembly is done in Belgium, which provides all parties with the best guarantee for quality and flexibility.

SPARE PARTS

Even long after the warranty period, we want to grant you a lifelong enjoyment of our products. Therefore we offer an extensive after sales service program. Not only can you order replacement canopies or frames, but you can also order each available individual component of your umbrella. To make it easy for you, we have detailed technical drawings of each product, so that you can quickly identify the piece you need. Umbrosa will charge you a limited fixed cost for picking and packing of spare parts. Detailed drawings can be found on our website under the section 'downloads', or in the installation manuals.

NG Design, Bundl, Tore Bleuzé, Pieter Willemyns, Peter Leleu, Alien Schoenaerts, Dirk Wynants

UMBROSA SHADE SAILS

Umbrosa also offers a range of shade sails. We have three different shapes that come in multiple sizes. The shade sails can be attached to a fixed or flexible point on a wall or on a pole with sliding unit. The pole is available in aluminium or black.

The price for Ingenua sails starts from 526 €.

PRODUCTION LEAD TIMES

QUICK SHIP = 3 DAYS PRODUCTION TIME

NON QUICK SHIP = 3 WEEKS PRODUCTION TIME

- In order to give you a clear and transparent lead time, Umbrosa works with a simple indication of the departure date for each product and/or model. You will find a summary table with every collection. In that way you always know when goods will be available!
- The popular models are available as 'QS' or 'Quick Ship'. This means that the items will leave the Umbrosa warehouses within a maximum of 3 working days. From this year on, it is the fabric and not the pole finish that determines the production lead time. Within the standard range, Umbrosa offers the frame in Alu (anodised or lacquered in 'natural anodising') and/or lacquered in Black (RAL 9005), depending on the collection.
- All UX/PX collections have a production lead time of 3 weeks.
- The non-Quick Ships are available within a maximum departure time of 3 weeks, meaning that these items will leave the Umbrosa warehouses within a period up to 3 weeks.
- The Quick Ship colours are available in usual quantities. Please get in touch with Umbrosa for more information.

PRODUCTION TIME, COLOURS AND MODELS													
SPECTRA	SOLIDUM				COLORUM								
	Natural	Canvas	Grey	Taupe	Marble	Curacao	Mint	Blush	Pepper	Almond	Sand	Flanelle	Black
	QS	3	3	3	3	3	3	3	3	3	3	3	3

USE OF PRODUCTCODES

Use our simplified product codes to place your order. We have simplified the Umbrosa codes and as a result they are now much more user-friendly. Please mention the correct code with every order. This not only saves us time, but helps you as a client as well and will limit the chance of mistakes. SKU for mounting option are base must also be given.

Construction of the codes:

- name of the collection either in full or abbreviated
- the nature of the product or the form f.e. holder, pole, cover, round, square,...
- dimension/size of the umbrella
- the colour of the umbrella needs to be filled out at the back (in the Quick Ship chart, the colours are mentioned above the codes)

QR-CODES

On each collection page you will find a QR code with a direct link to the product's technical data sheet. In this way you can easily find the extra information needed to close your sale.

COMPLAINTS AND AFTER SALES SERVICE

Every complaint or after sales service will be treated with the utmost care once we have received the following information:

- Commercial Invoice
- Photos or video showing the problem
- Description of the issue

FABRICS

Umbrosa has two collections of parasol fabrics. The Solidum colours are standard colours. Per collection one or more colours are offered in Quick Ship. The fabric is 100% Acryl and is made by Dickson.

The Colorum collection contains the more exclusive colours and has a production lead time of 3 weeks. These fabrics, also 100% Acrylic, are manufactured by Dickson (Sunbrella) or Tuvatextil (Agora).

SOLIDUM: Acryl 250 gr/m2 / Color Rating 7/8 (max = 8) / Water repellent

COLORUM: Acryl 260 gr/m2 / Color Rating 7/8 (max = 8) / Water repellent

INGENUA

CONCEPT

QR code to spec sheet

Umbrosa doesn't shy away from any challenge when it comes to providing custom shade solutions, even for larger surfaces. With Ingenua's ingenious sliding system, adjusting the sail to the position of the sun, the conditions, and the surroundings is a breeze. The sleek lines and modern forms of Ingenua are combined with impressive wind resistance.

DESIGNER

Pieter Willemyns and the Umbrosa Design Team

USP

The most practical, flexible and stylish shade sail system

SELLING TIPS

- Accessible system with many possibilities, also for larger areas
- Numerous combinations and colours can create different atmospheres
- Unique sliding system in pole: adjustable in height and according to the position of the sun
- Quick assembly and disassembly of the sail

NICE TO KNOW

Most installations are done with at least one corner fixed to the wall, using the wall profile or wallkit. Sails can be fixed to any element that is strong enough (e.g. a tree). Every sail comes with a storage bag and the necessary ropes. The choice of size and shape is a matter of personal taste and depends on the area that needs to be covered. The Ingenua shade sails are to be used under normal weather circumstances and have a wind rating up to 50 km/h or 31 mp/h. When there are strong winds it is advisable to take the sails down.

The sails are water-repellent and not waterproof. Follow these 3 guidelines for a successful installation:

1. The fixation of a corner needs to be in the direction of the line that cuts a corner in two equal parts, ensuring maximum tension.
2. It is recommended to install the fixations on at least 0,5 m on each side of the sail. Example: a 4 m sail has fixation points that are 5 m from each other. Exception: one corner can be fixed directly on the wall without any ropes.
3. Make sure that you can put the sail under a 30° angle to ensure a good flow in case of rain and to prevent water pockets.

WARRANTY

USE

Umbrosa always adheres to the warranty obligations of Belgian and European manufacturers in accordance with the law. All warranty requests must be submitted out via the trader or website where the product was purchased. Umbrosa strives to develop and produce **high-end, high-quality, and sustainable products**. Products that are optimized to withstand weather conditions and the environment in which they are used. All Umbrosa products are **extensively tested to guarantee their quality**. This includes tests conducted at the University of Delft (NL) wind tunnel, and component testing with independent research laboratories. In case of damage, the Umbrosa products can be repaired. A **comprehensive after-sales department** has been put in place to this end. The biggest threat to the lifespan of an Umbrosa umbrella are the weather conditions and external environmental factors. Therefore, always provide the appropriate care for any Umbrosa product and never leave it open unattended. Damage caused by incorrect use or extreme weather conditions such as wind, snow, hail, storm, ... is excluded from the warranty. **Wind tunnel tests** with permanent fixation of the umbrella have shown that Umbrosa products can withstand wind speeds of over **40 km/hour (5 Beaufort)**. Damage caused at unattended moments or by poor fixation or use of weak supports are not covered by our warranty programme. As wind does not have a constant speed, and as gusts of wind are often more powerful than imagined, we advise to close the umbrella at all times whenever wind speeds exceed 30 km/hour (4 Beaufort). When closing the umbrella the strap and protection cover need to be correctly used. Failure in doing so can cause damage even in a closed position. This kind of damage is not covered by our warranty programme. The use of mobile or movable base has an impact on the wind resistance of the umbrella. Therefore, always select the heaviest available base to enhance security. Always contact the distributor or Umbrosa should you desire advice on the anchoring method to be used. www.umbrosa.com contains a large amount of information on this topic. Direct and indirect damage caused by a falling umbrella, whether it is in open or closed position, is not covered by the warranty. Tests conducted by independent laboratories have demonstrated that the corrosion resistance of Umbrosa products is better than normal. With intensive usage of the products in a hostile (sea, sand, chlorine, ...) environment, we advise that you regularly rinse the frame and canopy of the umbrella using fresh water in order to prevent the build-up of salt residue. You can purchase these from Umbrosa. Use of the warranty always requires the presentation of the original purchase invoice. Umbrosa also makes use of serial numbers. This number must always be stated with every warranty request. www.umbrosa.com offers a complaint form with clear specifications of the information necessary to process the warranty request efficiently and quickly. Warranty requests must always be submitted in writing within a reasonable term after the initial observation of the issue. Umbrosa guarantees that the problem will be solved, **be it through replacement, repair, or a custom solution**. The warranty is always extended with the duration of "non-usage". The warranty does not restart in case of replacement with a new product. Transportation and performance of the repairs are not borne by Umbrosa. The Umbrosa guarantee only applies if the product was installed in accordance with the Umbrosa installation manual. The warranty shall completely lapse in case of use of accessories not approved by Umbrosa.

SPECIAL WARRANTY PROVISIONS "HARDWARE" :

15-year warranty**

Umbrosa offers a 15-year warranty on all aluminum extrusion profiles. This warranty only covers damage caused by construction or manufacturing errors, scratches, superficial corrosion, and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

5-year warranty*

Umbrosa offers a 5-year warranty on all glass fiber ribs and all welded tubes. Umbrosa offers a 5-year warranty on all stainless steel. Scratches, superficial corrosion, and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

3-year warranty*

Umbrosa offers a 3-year warranty on all synthetic parts and all galvanized steel parts. Scratches and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

2-year warranty*

Umbrosa offers a 2-year warranty on granite base, tile base, and mobile concrete base. Scratches, superficial corrosion, and wear due to use are not covered by this warranty. Breakage of the concrete or granite base due to use in case of strong wind is not covered under this warranty. In case of breakage, the new replacement concrete part may show a difference in colour, this is unavoidable. Umbrosa offers a 2-year warranty on all painted parts. Whenever the paint flakes off or forms bubbles, Umbrosa will replace the damaged item, or present a custom solution.

Caution:

Umbrosa uses natural products or materials (wood, concrete, granite, ...) that are susceptible to weather conditions and thus naturally age. The natural ageing process in outdoor conditions is not covered by warranty. Likewise, Umbrosa cannot guarantee that its products will be free from stains due to animal excrement and/or pollution phenomena.

(*) Warranty is only applicable when the Umbrosa products are used under normal wind conditions and when they are thoroughly and regularly maintained as described in the manual under chapter 'do's and don't's'. Direct or indirect damage caused by incorrect use or wrong installation are not covered by the warranty.

WARRANTY

SPECIAL WARRANTY PROVISIONS "FABRICS & TEXTILE PREFABRICATION" :

Extensive research, testing and years of experience have proven fabrics in acrylic to be the best fabric for use on the Umbrosa products.

5 year warranty (except for Ingenua and protection covers) **

All fabrics in all collections, with the explicit exception of the Ingenua collection, a 5-year warranty is offered for discolouration and structural integrity. In the exceptional case of discolouration, Umbrosa will lay out a compensation proposal proportional to the usage period of the product, or a choice will be offered to receive a new canopy whereby the cost for cutting & prefabrication will be charged. Under no circumstances will discolouration result in the free delivery of a new canopy. Burn holes, melted holes, or fabric deformation are therefore not covered by the warranty since these are caused by inappropriate use of the umbrosa products. Daily protection of the umbrella using the protective cover enhances the lifespan of the umbrella exponentially.

2 or 3 year warranty for the Ingenua sails ()**

For no other product is usage intensity as well as exposure to UV so different from user to user. Due to the intensive usage of Ingenua sails, very specific warranty conditions apply to this collection.

The warranty on these sails covers discolouration and structural integrity. For continental Europe, this warranty is 3 years. In the exceptional case of discolouration, Umbrosa will lay out a compensation proposal proportional to the usage period of the product, or a choice will be offered to receive a new canopy whereby the cost for cutting & prefabrication will be charged. Under no circumstances will discolouration result in the free delivery of a new canopy. Outside of continental Europe, the warranty is 2 years. Research does show that the expected lifespan is 5 to 8 years under normal usage, i.e. with daily covering of the sail using the appropriate protective cover and storing it in a dry place.

Special warranty conditions - Zippers

Zippers are very susceptible to correct usage. The risk of breakage increases exponentially in case of inappropriate usage of the zipper. Therefore, study the usage instructions very closely if the selected product has a zipper. If the zipper is stiff, this issue can quickly be resolved using a silicone spray or another lubricant (no oil!).

In case of zipper breakage, Umbrosa can send a replacement zipper.

LEGAL WARRANTY ON PROTECTION COVERS :

Protection covers are covered by the legal warranty.

PRICES AND DIMENSIONS

- Prices are subject to change. The prices are the basis for the discount that applies to you. So please always contact us to be sure you have the most recent pricelist. Do not hesitate to contact us if you would like to receive a specific quotation for larger quantities or for a specific project.
- The dimensions listed in this pricelist may vary with +/-2%, we are not responsible for any discrepancies within this margin. If a dimension is of extreme importance, please do not hesitate to contact Umbrosa to ask for the latest drawing.
- Items not mentioned in this price list are only available under certain conditions. For more details, contact Umbrosa.

NICE TO KNOW

UV rays have an impact on all substances and materials that are used outside. On the one hand we can speak about the 'discolouration' of the fabrics and on the other hand also about 'weakening'. Both can affect life expectancy. In addition, UV rays also have a detrimental effect on people. The UV rays can cause skin irritation, skin aging and skin cancer. To prevent these effects of UV rays, Umbrosa is using high quality fabrics and materials which have a proven colour fastness and offer the necessary protection against the sun. Umbrosa guarantees you products that will bring you years of joy.

(**) Warranty is only valid if the user does not make any changes to the specified sail systems and accessories. Umbrosa products are used under normal wind conditions and are well and regularly maintained. Damage caused by friction or water collection are not covered by the warranty. This must be avoided at all times as described in the manual chapter 'Do's and Don't's'.

WARRANTY

BEAUFORT SCALE

BEAUFORT N°	DESCRIPTION	KM/U	MPH	EFFECTS OBSERVED ON LAND
1	Light air	1-5	1-3	Direction of wind shown by smoke drift.
2	Light breeze	6-11	4-6	Wind felt on face, leaves rustle.
3	Gentle breeze	12-19	7-10	Leaves and small twigs in constant motion, wind extends light flag.
4	Moderate breeze	20-28	11-16	Raises dust and loose paper, small branches are moved.
5	Fresh breeze	29-38	17-21	Small trees in leaf begin to sway, crested wavelets form on inland waters.
6	Strong breeze	39-49	22-27	Large branches in motion, umbrellas used with difficulty.
7	Near gale	50-61	28-33	Whole trees in motion, inconvenience felt in walking against the wind.
8	Gale	62-74	34-40	Breaks twigs of trees.
9	Strong gale	75-88	41-47	Slight structural damage occurs (chimney pots and slate removed).
10	Storm	89-102	48-55	Trees uprooted, considerable structural damage occurs.

PRODUCT STRENGTH ACCORDING TO THE BEAUFORT SCALE*

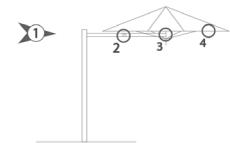

PRODUCT	BFT SCORE	PRODUCT	BFT SCORE
PARAFLEX / PARAFLEX UX	3 - 6	INGENUA	4 - 8
SPECTRA / VERSA UX	4 - 7	ECLIPSUM UX	5 - 6
NANO UX	4 - 7	ICARUS / ICARUS UX	5 - 9
INFINA / INFINA UX	4 - 7		

* The wind scores are valid for a parasol placed on the ground floor. For installation of a parasol on another, higher floor, contact Umbrosa for the best possible solution.

TIPS FOR THE IDEAL WIND POSITION

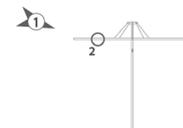

PARAFLEX / PARAFLEX UX

For Paraflex (UX) we advise to position the arm following the direction of the wind (1), completely stretch out the arm (2), place the grip in between the ribs (3), put the umbrella horizontally (4) and on a flat surface.

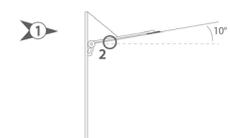

INFINA / INFINA UX

For Infina, we advise to avoid wind from below (1), to put full tension on the canopy and put the umbrella on a flat surface.

SPECTRA / VERSA UX / NANO UX

For Spectra, Versa UX, Nano UX, we advise to position the umbrella in the direction of the wind (1), put the arm in a 10° angle (2) and put the umbrella on a flat surface.

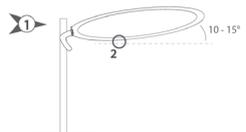

ICARUS / ICARUS UX

For Icarus (UX), we advise to position the umbrella in the direction of the wind (1), put the umbrella in a slight upward position (2) and put it on a flat surface.

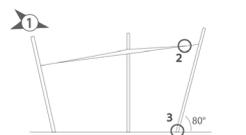

ECLIPSUM UX

For Eclipsium UX, we advise to position the umbrella in the direction of the wind (1), put the circle under a slight angle (2) and put it on a flat surface.

INGENUA

For Ingenua, we advise you to put the sail in a angled position to prevent wind from getting under the sail (1); to put full tension on the sail only by using the Umbrosa ropes and dogbones (2) and to install the poles in a backward position (3).

GENERAL

When closing the umbrella, the strap and protection cover need to be correctly used. Failure in doing so can cause damage, even in a closed position.

UMBROSA COMPANY

umbrosus, a, um (adi.) 1. Shady, leafy, full of shade, shaded - Umbrosa embodies innovative shade solutions with a young and dynamic appeal. Our umbrella collections exude class, flexibility, and thoughtful design. They ensure protection from the sun in an effortless and stylish manner. At Umbrosa, we make a statement of elegance and simplicity. We collaborate with leading international designers and proudly produce under the label 'Made In Belgium'. Our team of designers and creative minds pays special attention to the unique character and bold creativity of each design.

Quality and sustainability are essential values in our production process, resulting in long-lasting shade year after year. Our umbrella families have become renowned worldwide on the most breathtaking terraces and among the most prestigious hotel groups in over 90 countries. Nature is an endless source of inspiration that constantly stimulates us. Just as trees and plants provide shade in a unique way, we aim to offer shade solutions to our customers in that same distinctive manner.

Umbrosa strives to develop versatile and innovative shade creations that are far removed from the traditional umbrella. As the unique umbrella design brand for both residential and commercial use, Umbrosa offers affordable prices without compromising on style and quality.

TEAM

At Umbrosa, customers experience the perfect combination of flexibility and personal service, typical of a small-scale organization, while enjoying the expertise and reputation of a global player, as evidenced by our numerous international references. Our loyal customers benefit from the advice and guidance of a dedicated contact person, who's full of passion and knowledge and ready to assist them. With our team of 40 people based in Belgium, we master the entire production process, from innovative product development to successful commercialization. We take pride in the fact that all our products, ranging from Paraflex and Ingenua to Icarus, Spectra, Infina, and the UX collection, are manufactured with care and craftsmanship in Belgium: a guarantee of sustainable Belgian quality! April 2022 marks an exciting milestone for Umbrosa! Not only have we expanded our sales activities to the United States, but we are also delivering directly from our brand-new warehouse in Baytown, TX. We can't wait to conquer the American market, which is filled with unprecedented potential for Umbrosa. Get ready, USA, Umbrosa is coming!

VISION AND MISSION STATEMENT

Vision

Umbrosa wants to provide all terraces and gardens around the world with Unique Shade Solutions.

Mission

To manufacture high-end shade solutions in Belgium, that offer the optimal user experience, by designing unique, innovative and sustainable products, that have an impact on outdoor living.

Values

Passion | Communication | Perfection | Personal growth

DESIGNERS

Umbrosa distinguishes itself by a daring design that is both accessible and playful. To obtain this, we call on renowned designers - NG Design, Dirk Wynants, Bundl, Fosfor, Pieter Willemyns, Peter Leleu, Alien Schoenaerts and Tore Bleuzé - each of them has a creative vision and innovative ideas which give a whole new meaning to the concept of a standard umbrella.

MADE IN BELGIUM

All design, development and assembly is done in Belgium, which provides all parties with the best guarantee for quality and flexibility.

SPARE PARTS

Even long after the warranty period, we want to grant you a lifelong enjoyment of our products. Therefore we offer an extensive after sales service program. Not only can you order replacement canopies or frames, but you can also order each available individual component of your umbrella. To make it easy for you, we have detailed technical drawings of each product, so that you can quickly identify the piece you need. Umbrosa will charge you a limited fixed cost for picking and packing of spare parts. Detailed drawings can be found on our website under the section 'downloads', or in the installation manuals.

NG Design, Bundl, Tore Bleuzé, Pieter Willemyns, Peter Leleu, Alien Schoenaerts, Dirk Wynants

STANDARD COLLECTION

The Umbrosa standard collection consists of 4 collections where each model is available in 14 different canopy colours. This collection contains a range of wall mounted umbrellas, centre pole umbrellas and cantilever umbrellas.

		Price from
Paraflex WALL	Wall mounted umbrella	€ 976
Paraflex MONO	Cantilever umbrella	€ 1.361
Infina	Centre pole umbrella	€ 1.350
Spectra	Cantilever umbrella	€ 2.260
Icarus	Cantilever umbrella	€ 3.365

PRODUCTION LEAD TIMES

QUICK SHIP = 3 DAYS PRODUCTION TIME

NON QUICK SHIP = 3 WEEKS PRODUCTION TIME

- In order to give you a clear and transparent lead time, Umbrosa works with a simple indication of the departure date for each product and/or model. You will find a summary table with every collection. In that way you always know when goods will be available!
- The popular models are available as 'QS' or 'Quick Ship'. This means that the items will leave the Umbrosa warehouses within a maximum of 3 working days. From this year on, it is the fabric and not the pole finish that determines the production lead time. Within the standard range, Umbrosa offers the frame in Alu (anodised or lacquered in 'natural anodising') and/or lacquered in Black (RAL 9005), depending on the collection.
- All UX/PX collections have a production lead time of 3 weeks.
- The non-Quick Ships are available within a maximum departure time of 3 weeks, meaning that these items will leave the Umbrosa warehouses within a period up to 3 weeks.
- The Quick Ship colours are available in usual quantities. Please get in touch with Umbrosa for more information.

PRODUCTION TIME, COLOURS AND MODELS													
SPECTRA	SOLIDUM				COLORUM								
	Natural	Canvas	Grey	Taupe	Marble	Curacao	Mint	Blush	Pepper	Almond	Sand	Flanelle	Black
	QS	3	3	3	3	3	3	3	3	3	3	3	3

USE OF PRODUCTCODES

Use our simplified product codes to place your order. We have simplified the Umbrosa codes and as a result they are now much more user-friendly. Please mention the correct code with every order. This not only saves us time, but helps you as a client as well and will limit the chance of mistakes. SKU for mounting option are base must also be given.

Construction of the codes:

- name of the collection either in full or abbreviated
- the nature of the product or the form f.e. holder, pole, cover, round, square,...
- dimension/size of the umbrella
- the colour of the umbrella needs to be filled out at the back (in the Quick Ship chart, the colours are mentioned above the codes)

QR-CODES

On each collection page you will find a QR code with a direct link to the product's technical data sheet. In this way you can easily find the extra information needed to close your sale.

COMPLAINTS AND AFTER SALES SERVICE

Every complaint or after sales service will be treated with the utmost care once we have received the following information:

- Commercial Invoice
- Photos or video showing the problem
- Description of the issue

FABRICS

Umbrosa has two collections of parasol fabrics. The Solidum colours are standard colours. Per collection one or more colours are offered in Quick Ship. The fabric is 100% Acryl and is made by Dickson.

The Colorum collection contains the more exclusive colours and has a production lead time of 3 weeks. These fabrics, also 100% Acrylic, are manufactured by Dickson (Sunbrella) or Tuvatextil (Agora).

SOLIDUM: Acryl 250 gr/m² / Color Rating 7/8 (max = 8) / Water repellent

COLORUM: Acryl 260 gr/m² / Color Rating 7/8 (max = 8) / Water repellent

PARAFLEX

CONCEPT

Nothing beats the versatility of the human body. As a result, for the Paraflex, we let ourselves be inspired by the manoeuvrability and strength of the human arm. A space-saving solution, without a base and without a pole, which offers you the possibility to create shade wherever you want, by means of one, two or more umbrellas, according to your needs. The light and compact Paraflex offers maximum shade and is highly wind-resistant.

DESIGNER

Peter Leleu

USP

The world's most flexible parasol.

SELLING TIPS

- Ideal for patios where there is no room for a base or pole (Wallflex)
- Flexible arm provides shade where desired
- Several configurations possible
- Easy to assemble
- Very easy to handle and store

INFINA

CONCEPT

The Infina stands for rest and simplicity. Without the busy knot of ribs and visible frame, the Infina is a real gem of pure aesthetics. The visually very soothing effect provides a clean design, which throws overboard all ballast of the classic center-pole umbrella. The Infina combines a minimalistic design with maximum performance in terms of wind-resistance.

DESIGNER

Dirk Wynants

USP

The highly sophisticated centre pole parasol.

SELLING TIPS

- Extremely easy to open and close
- Rope is nicely concealed in the pole
- Mobile base is very easy to move
- Minimalistic look

SPECTRA

CONCEPT

Step into the world of the Spectra cantilever umbrella, a true master of versatility. With its unique shape, this cantilever umbrella offers an endless range of positions. The sleek design effortlessly combines beauty with functionality thanks to its innovative fan system. Instead of closing vertically, the umbrella closes horizontally. A revolutionary and contemporary concept that is unmatched.

DESIGNER

Dirk Wynants

USP

The very first truly beautiful, elegant and functional parasol.

SELLING TIPS

- Very wind resistant thanks to the fiberglass ribs
- 180° fan system, easy to open and close
- The canopy can be fixed in different positions according to the position of the sun
- Pole rotates 360° around its axis.
- Spectra "forward (80°)" creates space between base and table.

ICARUS

CONCEPT

With the Icarus, Umbrosa hits two birds with one stone. Inspired by nature, we have designed an umbrella that also serves as a windscreen. The Icarus embraces and protects. It creates the safe shelter of a cocoon while allowing you to fully enjoy the beautiful weather.

DESIGNER

Bundl and Umbrosa design team

USP

The only parasol that can also be used as a windshield and that creates the ultimate cocoon with its unique and natural shape.

QR code to spec sheet

SELLING TIPS

- Extremely wind resistant parasol
- Large shaded area thanks to 360° rotation and height adjustment of the parasol
- Easy to use and ergonomic
- Cosy cocoon

USE

Umbrosa always adheres to the warranty obligations of Belgian and European manufacturers in accordance with the law. All warranty requests must be submitted out via the trader or website where the product was purchased. Umbrosa strives to develop and produce **high-end, high-quality, and sustainable products**. Products that are optimized to withstand weather conditions and the environment in which they are used. All Umbrosa products are **extensively tested to guarantee their quality**. This includes tests conducted at the University of Delft (NL) wind tunnel, and component testing with independent research laboratories. In case of damage, the Umbrosa products can be repaired. A **comprehensive after-sales department** has been put in place to this end. The biggest threat to the lifespan of an Umbrosa umbrella are the weather conditions and external environmental factors. Therefore, always provide the appropriate care for any Umbrosa product and never leave it open unattended. Damage caused by incorrect use or extreme weather conditions such as wind, snow, hail, storm, ... is excluded from the warranty. **Wind tunnel tests** with permanent fixation of the umbrella have shown that Umbrosa products can withstand wind speeds of over **40 km/hour (5 Beaufort)**. Damage caused at unattended moments or by poor fixation or use of weak supports are not covered by our warranty programme. As wind does not have a constant speed, and as gusts of wind are often more powerful than imagined, we advise to close the umbrella at all times whenever wind speeds exceed 30 km/hour (4 Beaufort). When closing the umbrella the strap and protection cover need to be correctly used. Failure in doing so can cause damage even in a closed position. This kind of damage is not covered by our warranty programme. The use of mobile or movable base has an impact on the wind resistance of the umbrella. Therefore, always select the heaviest available base to enhance security. Always contact the distributor or Umbrosa should you desire advice on the anchoring method to be used. www.umbrosa.com contains a large amount of information on this topic. Direct and indirect damage caused by a falling umbrella, whether it is in open or closed position, is not covered by the warranty. Tests conducted by independent laboratories have demonstrated that the corrosion resistance of Umbrosa products is better than normal. With intensive usage of the products in a hostile (sea, sand, chlorine, ...) environment, we advise that you regularly rinse the frame and canopy of the umbrella using fresh water in order to prevent the build-up of salt residue. You can purchase these from Umbrosa. Use of the warranty always requires the presentation of the original purchase invoice. Umbrosa also makes use of serial numbers. This number must always be stated with every warranty request. www.umbrosa.com offers a complaint form with clear specifications of the information necessary to process the warranty request efficiently and quickly. Warranty requests must always be submitted in writing within a reasonable term after the initial observation of the issue. Umbrosa guarantees that the problem will be solved, **be it through replacement, repair, or a custom solution**. The warranty is always extended with the duration of "non-usage". The warranty does not restart in case of replacement with a new product. Transportation and performance of the repairs are not borne by Umbrosa. The Umbrosa guarantee only applies if the product was installed in accordance with the Umbrosa installation manual. The warranty shall completely lapse in case of use of accessories not approved by Umbrosa.

SPECIAL WARRANTY PROVISIONS "HARDWARE" :

15-year warranty**

Umbrosa offers a 15-year warranty on all aluminum extrusion profiles. This warranty only covers damage caused by construction or manufacturing errors, scratches, superficial corrosion, and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

5-year warranty*

Umbrosa offers a 5-year warranty on all glass fiber ribs and all welded tubes. Umbrosa offers a 5-year warranty on all stainless steel. Scratches, superficial corrosion, and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

3-year warranty*

Umbrosa offers a 3-year warranty on all synthetic parts and all galvanized steel parts. Scratches and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

2-year warranty*

Umbrosa offers a 2-year warranty on granite base, tile base, and mobile concrete base. Scratches, superficial corrosion, and wear due to use are not covered by this warranty. Breakage of the concrete or granite base due to use in case of strong wind is not covered under this warranty. In case of breakage, the new replacement concrete part may show a difference in colour, this is unavoidable. Umbrosa offers a 2-year warranty on all painted parts. Whenever the paint flakes off or forms bubbles, Umbrosa will replace the damaged item, or present a custom solution.

Caution:

Umbrosa uses natural products or materials (wood, concrete, granite, ...) that are susceptible to weather conditions and thus naturally age. The natural ageing process in outdoor conditions is not covered by warranty. Likewise, Umbrosa cannot guarantee that its products will be free from stains due to animal excrement and/or pollution phenomena.

(*) Warranty is only applicable when the Umbrosa products are used under normal wind conditions and when they are thoroughly and regularly maintained as described in the manual under chapter 'do's and don't's'. Direct or indirect damage caused by incorrect use or wrong installation are not covered by the warranty.

WARRANTY

SPECIAL WARRANTY PROVISIONS "FABRICS & TEXTILE PREFABRICATION" :

Extensive research, testing and years of experience have proven fabrics in acrylic to be the best fabric for use on the Umbrosa products.

5 year warranty (except for Ingenua and protection covers) **

All fabrics in all collections, with the explicit exception of the Ingenua collection, a 5-year warranty is offered for discolouration and structural integrity. In the exceptional case of discolouration, Umbrosa will lay out a compensation proposal proportional to the usage period of the product, or a choice will be offered to receive a new canopy whereby the cost for cutting & prefabrication will be charged. Under no circumstances will discolouration result in the free delivery of a new canopy. Burn holes, melted holes, or fabric deformation are therefore not covered by the warranty since these are caused by inappropriate use of the umbrosa products. Daily protection of the umbrella using the protective cover enhances the lifespan of the umbrella exponentially.

2 or 3 year warranty for the Ingenua sails ()**

For no other product is usage intensity as well as exposure to UV so different from user to user. Due to the intensive usage of Ingenua sails, very specific warranty conditions apply to this collection.

The warranty on these sails covers discolouration and structural integrity. For continental Europe, this warranty is 3 years. In the exceptional case of discolouration, Umbrosa will lay out a compensation proposal proportional to the usage period of the product, or a choice will be offered to receive a new canopy whereby the cost for cutting & prefabrication will be charged. Under no circumstances will discolouration result in the free delivery of a new canopy. Outside of continental Europe, the warranty is 2 years. Research does show that the expected lifespan is 5 to 8 years under normal usage, i.e. with daily covering of the sail using the appropriate protective cover and storing it in a dry place.

Special warranty conditions - Zippers

Zippers are very susceptible to correct usage. The risk of breakage increases exponentially in case of inappropriate usage of the zipper. Therefore, study the usage instructions very closely if the selected product has a zipper. If the zipper is stiff, this issue can quickly be resolved using a silicone spray or another lubricant (no oil!).

In case of zipper breakage, Umbrosa can send a replacement zipper.

LEGAL WARRANTY ON PROTECTION COVERS :

Protection covers are covered by the legal warranty.

PRICES AND DIMENSIONS

- Prices are subject to change. The prices are the basis for the discount that applies to you. So please always contact us to be sure you have the most recent pricelist. Do not hesitate to contact us if you would like to receive a specific quotation for larger quantities or for a specific project.
- The dimensions listed in this pricelist may vary with +/-2%, we are not responsible for any discrepancies within this margin. If a dimension is of extreme importance, please do not hesitate to contact Umbrosa to ask for the latest drawing.
- Items not mentioned in this price list are only available under certain conditions. For more details, contact Umbrosa.

NICE TO KNOW

UV rays have an impact on all substances and materials that are used outside. On the one hand we can speak about the 'discolouration' of the fabrics and on the other hand also about 'weakening'. Both can affect life expectancy. In addition, UV rays also have a detrimental effect on people. The UV rays can cause skin irritation, skin aging and skin cancer. To prevent these effects of UV rays, Umbrosa is using high quality fabrics and materials which have a proven colour fastness and offer the necessary protection against the sun. Umbrosa guarantees you products that will bring you years of joy.

(**) Warranty is only valid if the user does not make any changes to the specified sail systems and accessories. Umbrosa products are used under normal wind conditions and are well and regularly maintained. Damage caused by friction or water collection are not covered by the warranty. This must be avoided at all times as described in the manual chapter 'Do's and Don't's'.

BEAUFORT SCALE

BEAUFORT N°	DESCRIPTION	KM/U	MPH	EFFECTS OBSERVED ON LAND
1	Light air	1-5	1-3	Direction of wind shown by smoke drift.
2	Light breeze	6-11	4-6	Wind felt on face, leaves rustle.
3	Gentle breeze	12-19	7-10	Leaves and small twigs in constant motion, wind extends light flag.
4	Moderate breeze	20-28	11-16	Raises dust and loose paper, small branches are moved.
5	Fresh breeze	29-38	17-21	Small trees in leaf begin to sway, crested wavelets form on inland waters.
6	Strong breeze	39-49	22-27	Large branches in motion, umbrellas used with difficulty.
7	Near gale	50-61	28-33	Whole trees in motion, inconvenience felt in walking against the wind.
8	Gale	62-74	34-40	Breaks twigs of trees.
9	Strong gale	75-88	41-47	Slight structural damage occurs (chimney pots and slate removed).
10	Storm	89-102	48-55	Trees uprooted, considerable structural damage occurs.

PRODUCT STRENGTH ACCORDING TO THE BEAUFORT SCALE*

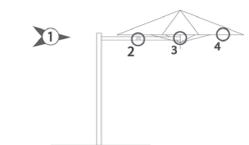

PRODUCT	BFT SCORE	PRODUCT	BFT SCORE
PARAFLEX / PARAFLEX UX	3 - 6	INGENUA	4 - 8
SPECTRA / VERSA UX	4 - 7	ECLIPSUM UX	5 - 6
NANO UX	4 - 7	ICARUS / ICARUS UX	5 - 9
INFINA / INFINA UX	4 - 7		

* The wind scores are valid for a parasol placed on the ground floor. For installation of a parasol on another, higher floor, contact Umbrosa for the best possible solution.

TIPS FOR THE IDEAL WIND POSITION

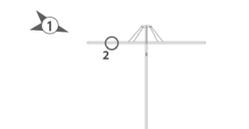

PARAFLEX / PARAFLEX UX

For Paraflex (UX) we advise to position the arm following the direction of the wind (1), completely stretch out the arm (2), place the grip in between the ribs (3), put the umbrella horizontally (4) and on a flat surface.

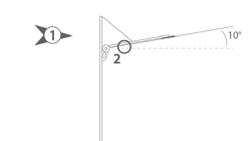

INFINA / INFINA UX

For Infina, we advise to avoid wind from below (1), to put full tension on the canopy and put the umbrella on a flat surface.

SPECTRA / VERSA UX / NANO UX

For Spectra, Versa UX, Nano UX, we advise to position the umbrella in the direction of the wind (1), put the arm in a 10° angle (2) and put the umbrella on a flat surface.

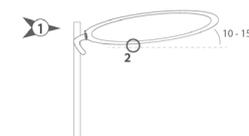

ICARUS / ICARUS UX

For Icarus (UX), we advise to position the umbrella in the direction of the wind (1), put the umbrella in a slight upward position (2) and put it on a flat surface.

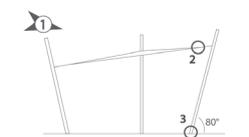

ECLIPSUM UX

For Eclipsium UX, we advise to position the umbrella in the direction of the wind (1), put the circle under a slight angle (2) and put it on a flat surface.

INGENUA

For Ingenua, we advise you to put the sail in a angled position to prevent wind from getting under the sail (1); to put full tension on the sail only by using the Umbrosa ropes and dogbones (2) and to install the poles in a backward position (3).

GENERAL

When closing the umbrella, the strap and protection cover need to be correctly used. Failure in doing so can cause damage, even in a closed position.

UMBROSA COMPANY

umbrosus, a, um (adi.) 1. Shady, leafy, full of shade, shaded - Umbrosa embodies innovative shade solutions with a young and dynamic appeal. Our umbrella collections exude class, flexibility, and thoughtful design. They ensure protection from the sun in an effortless and stylish manner. At Umbrosa, we make a statement of elegance and simplicity. We collaborate with leading international designers and proudly produce under the label 'Made In Belgium'. Our team of designers and creative minds pays special attention to the unique character and bold creativity of each design.

Quality and sustainability are essential values in our production process, resulting in long-lasting shade year after year. Our umbrella families have become renowned worldwide on the most breathtaking terraces and among the most prestigious hotel groups in over 90 countries. Nature is an endless source of inspiration that constantly stimulates us. Just as trees and plants provide shade in a unique way, we aim to offer shade solutions to our customers in that same distinctive manner.

Umbrosa strives to develop versatile and innovative shade creations that are far removed from the traditional umbrella. As the unique umbrella design brand for both residential and commercial use, Umbrosa offers affordable prices without compromising on style and quality.

TEAM

At Umbrosa, customers experience the perfect combination of flexibility and personal service, typical of a small-scale organization, while enjoying the expertise and reputation of a global player, as evidenced by our numerous international references. Our loyal customers benefit from the advice and guidance of a dedicated contact person, who's full of passion and knowledge and ready to assist them. With our team of 40 people based in Belgium, we master the entire production process, from innovative product development to successful commercialization. We take pride in the fact that all our products, ranging from Paraflex and Ingenua to Icarus, Spectra, Infina, and the UX collection, are manufactured with care and craftsmanship in Belgium: a guarantee of sustainable Belgian quality! April 2022 marks an exciting milestone for Umbrosa! Not only have we expanded our sales activities to the United States, but we are also delivering directly from our brand-new warehouse in Baytown, TX. We can't wait to conquer the American market, which is filled with unprecedented potential for Umbrosa. Get ready, USA, Umbrosa is coming!

VISION AND MISSION STATEMENT

Vision

Umbrosa wants to provide all terraces and gardens around the world with Unique Shade Solutions.

Mission

To manufacture high-end shade solutions in Belgium, that offer the optimal user experience, by designing unique, innovative and sustainable products, that have an impact on outdoor living.

Values

Passion | Communication | Perfection | Personal growth

DESIGNERS

Umbrosa distinguishes itself by a daring design that is both accessible and playful. To obtain this, we call on renowned designers - NG Design, Dirk Wynants, Bundl, Fosfor, Pieter Willemyns, Peter Leleu, Alien Schoenaerts and Tore Bleuzé - each of them has a creative vision and innovative ideas which give a whole new meaning to the concept of a standard umbrella.

NG Design, Bundl, Tore Bleuzé, Pieter Willemyns, Peter Leleu, Alien Schoenaerts, Dirk Wynants

MADE IN BELGIUM

All design, development and assembly is done in Belgium, which provides all parties with the best guarantee for quality and flexibility.

SPARE PARTS

Even long after the warranty period, we want to grant you a lifelong enjoyment of our products. Therefore we offer an extensive after sales service program. Not only can you order replacement canopies or frames, but you can also order each available individual component of your umbrella. To make it easy for you, we have detailed technical drawings of each product, so that you can quickly identify the piece you need. Umbrosa will charge you a limited fixed cost for picking and packing of spare parts. Detailed drawings can be found on our website under the section 'downloads,' or in the installation manuals.

UX COLLECTION

Welcome to the boundless world of the UX collection, where conventions are broken. Each UX parasol is a unique combination of color, shape, and materials, with unparalleled ease of use and ergonomics. These parasols elevate any outdoor environment to a higher level, with subtle luxury for those seeking that extra touch of refinement. The UX concepts are meticulously finished down to the smallest details and are presented as such. The canopy, frame, and parasol base come together as one harmonious entity, creating a unique concept. Umbrosa offers six enchanting UX collections: Versa UX, Paraflex UX, Nano UX, Icarus UX, Infina UX, and Eclisum UX.

		Price from
Paraflex UX WALL	Wall mounted umbrella	€ 1.373
Paraflex UX MONO	Cantilever umbrella	€ 1.868
Nano UX	Cantilever umbrella	€ 1.651
Infina UX	Centre pole umbrella	€ 2.103
Versa UX	Cantilever umbrella	€ 3.766
Icarus UX	Cantilever umbrella	€ 4.092
Eclisum UX	Cantilever umbrella	€ 4.545

PX COLLECTION

PX stands for "Personal Experience", create your own parasols according to your personal taste, with the highest level of finishing and the unique Versa features. The Versa PX collection allows you to freely combine the shape of the canopy (square or round), the color of the frame, the canopy and the parasol base.

		Price from
Versa PX	Cantilever umbrella	€ 5.212

PRODUCTION LEAD TIMES

QUICK SHIP = 3 DAYS PRODUCTION TIME

NON QUICK SHIP = 3 WEEKS PRODUCTION TIME

- In order to give you a clear and transparent lead time, Umbrosa works with a simple indication of the departure date for each product and/or model. You will find a summary table with every collection. In that way you always know when goods will be available!
- The popular models are available as 'QS' or 'Quick Ship'. This means that the items will leave the Umbrosa warehouses within a maximum of 3 working days. From this year on, it is the fabric and not the pole finish that determines the production lead time. Within the standard range, Umbrosa offers the frame in Alu (anodised or lacquered in 'natural anodising') and/or lacquered in Black (RAL 9005), depending on the collection.
- All UX and PX collections have a production lead time of 3 weeks
- The non-Quick Ships are available within a maximum departure time of 3 weeks, meaning that these items will leave the Umbrosa warehouses within a period up to 3 weeks.
- The Quick Ship colours are available in usual quantities. Please get in touch with Umbrosa for more information.

PRODUCTION TIME, COLOURS AND MODELS													
SPECTRA	SOLIDUM				COLORUM								
	Natural	Canvas	Grey	Taupe	Marble	Curacao	Mint	Blush	Pepper	Almond	Sand	Flanelle	Black
	QS	3	3	3	3	3	3	3	3	3	3	3	3

USE OF PRODUCTCODES

Use our simplified product codes to place your order. We have simplified the Umbrosa codes and as a result they are now much more user-friendly. Please mention the correct code with every order. This not only saves us time, but helps you as a client as well and will limit the chance of mistakes. SKU for mounting option are base must also be given.

Construction of the codes:

- name of the collection either in full or abbreviated
- the nature of the product or the form f.e. holder, pole, cover, round, square,...
- dimension/size of the umbrella
- the colour of the umbrella needs to be filled out at the back (in the Quick Ship chart, the colours are mentioned above the codes)

QR-CODES

On each collection page you will find a QR code with a direct link to the product's technical data sheet. In this way you can easily find the extra information needed to close your sale.

COMPLAINTS AND AFTER SALES SERVICE

Every complaint or after sales service will be treated with the utmost care once we have received the following information:

- Commercial Invoice
- Photos or video showing the problem
- Description of the issue

FABRICS

Umbrosa has two collections of parasol fabrics. The Solidum colours are standard colours. Per collection one or more colours are offered in Quick Ship. The fabric is 100% Acryl and is made by Dickson.

The Colorum collection contains the more exclusive colours and has a production lead time of 3 weeks. These fabrics, also 100% Acrylic, are manufactured by Dickson (Sunbrella) or Tuvatextil (Agora).

SOLIDUM: Acryl 250 gr/m² / Color Rating 7/8 (max = 8) / Water repellent

COLORUM: Acryl 260 gr/m² / Color Rating 7/8 (max = 8) / Water repellent

UX/PX COLLECTION

UX

Welcome to the boundless world of the UX collection, where conventions are broken. Each UX parasol is a unique combination of color, shape, and materials, with unparalleled ease of use and ergonomics. These parasols elevate any outdoor environment to a higher level, with subtle luxury for those seeking that extra touch of refinement. The UX concepts are meticulously finished down to the smallest details and are presented as such. The canopy, frame, and parasol base come together as one harmonious entity, creating a unique concept. Umbrosa offers six enchanting UX collections: Versa UX, Paraflex UX, Nano UX, Icarus UX, Infina UX, and Eclipsum UX.

PX

PX stands for "Personal Experience", create your own parasols according to your personal taste, with the highest level of finishing and the unique Versa features. The Versa PX collection allows you to freely combine the shape of the canopy (square or round), the color of the frame, the canopy and the parasol base.

VERSA UX/PX

Within the Versa UX range, we have five models. The square Versa UXs: Architecture, Full Black and Sand; and the round Versa UXs: Latte and Safari. Each parasol has its own unique identity and composition. Combinations between the models are possible within the PX collection.

NANO UX

The Nano UX parasol is the compact design cantilever parasol for smaller terraces. The most unique feature of this parasol is its ability to tilt horizontally. It is available in two versions: Full Black and Architecture.

PARAFLEX UX

A fully black wall parasol consisting of a black lacquered Neo arm and a black canopy. The Paraflex UX is available in two versions: 1.9m and 2.3m in both wallmount and monopole.

ICARUS UX

The leaf-shaped Icarus has been given a full facelift and is now also available fully powdercoated in 2 versions: Full Black and Sand. The design team has focused on ultimate ease of use and sustainability: all parts are sourced locally.

ECLIPSUM UX

The round Eclipsum has also been thoroughly redesigned. The parasol has been reinforced on several levels: stronger glass fibre rods in the canopy and a more powerful rotation axis ensure that the Eclipsum has become even more wind resistant. The cleaner design - less visible bolts, a perfectly round canopy that is completely flat - results in an iconic parasol that will not leave you unmoved. The UX versions in Full Black and Architecture reinforce the extremely unique look of this "one-of-a-kind" parasol.

INFINA UX

The Infina UX Latte is a round parasol with a central post and a diameter of 3.5 m. The combination of the grey-beige frame, the canvas canopy, and the parasol base with a wooden cover perfectly complements both classic and modern homes. The parasol can be easily moved following the position of the sun.

USP

The impressive combination of luxury and sophistication in a robust and particularly user-friendly parasol.

SELLING TIPS

- New 360° fan concept - easy to open and close
- Height adjustable with one hand
- Rotation system (360°) is nicely integrated into the elegant parasol base
- Robust and extremely wind resistant (glass fiber ribs)
- Leans slightly forward (80°) in order to create space between the table and base

USP

The most compact and sophisticated parasol for city gardens or smaller terraces.

SELLING TIPS

- Easy to ship
- Parasol tilts horizontally for a larger shade range
- Lightweight, elegant, matching parasol base available
- Perfect price/quality ratio

WARRANTY

USE

Umbrosa always adheres to the warranty obligations of Belgian and European manufacturers in accordance with the law. All warranty requests must be submitted out via the trader or website where the product was purchased. Umbrosa strives to develop and produce **high-end, high-quality, and sustainable products**. Products that are optimized to withstand weather conditions and the environment in which they are used. All Umbrosa products are **extensively tested to guarantee their quality**. This includes tests conducted at the University of Delft (NL) wind tunnel, and component testing with independent research laboratories. In case of damage, the Umbrosa products can be repaired. A **comprehensive after-sales department** has been put in place to this end. The biggest threat to the lifespan of an Umbrosa umbrella are the weather conditions and external environmental factors. Therefore, always provide the appropriate care for any Umbrosa product and never leave it open unattended. Damage caused by incorrect use or extreme weather conditions such as wind, snow, hail, storm, ... is excluded from the warranty. **Wind tunnel tests** with permanent fixation of the umbrella have shown that Umbrosa products can withstand wind speeds of over **40 km/hour (5 Beaufort)**. Damage caused at unattended moments or by poor fixation or use of weak supports are not covered by our warranty programme. As wind does not have a constant speed, and as gusts of wind are often more powerful than imagined, we advise to close the umbrella at all times whenever wind speeds exceed 30 km/hour (4 Beaufort). When closing the umbrella the strap and protection cover need to be correctly used. Failure in doing so can cause damage even in a closed position. This kind of damage is not covered by our warranty programme. The use of mobile or movable base has an impact on the wind resistance of the umbrella. Therefore, always select the heaviest available base to enhance security. Always contact the distributor or Umbrosa should you desire advice on the anchoring method to be used. www.umbrosa.com contains a large amount of information on this topic. Direct and indirect damage caused by a falling umbrella, whether it is in open or closed position, is not covered by the warranty. Tests conducted by independent laboratories have demonstrated that the corrosion resistance of Umbrosa products is better than normal. With intensive usage of the products in a hostile (sea, sand, chlorine, ...) environment, we advise that you regularly rinse the frame and canopy of the umbrella using fresh water in order to prevent the build-up of salt residue. You can purchase these from Umbrosa. Use of the warranty always requires the presentation of the original purchase invoice. Umbrosa also makes use of serial numbers. This number must always be stated with every warranty request. www.umbrosa.com offers a complaint form with clear specifications of the information necessary to process the warranty request efficiently and quickly. Warranty requests must always be submitted in writing within a reasonable term after the initial observation of the issue. Umbrosa guarantees that the problem will be solved, **be it through replacement, repair, or a custom solution**. The warranty is always extended with the duration of "non-usage". The warranty does not restart in case of replacement with a new product. Transportation and performance of the repairs are not borne by Umbrosa. The Umbrosa guarantee only applies if the product was installed in accordance with the Umbrosa installation manual. The warranty shall completely lapse in case of use of accessories not approved by Umbrosa.

SPECIAL WARRANTY PROVISIONS "HARDWARE" :

15-year warranty**

Umbrosa offers a 15-year warranty on all aluminum extrusion profiles. This warranty only covers damage caused by construction or manufacturing errors, scratches, superficial corrosion, and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

5-year warranty*

Umbrosa offers a 5-year warranty on all glass fiber ribs and all welded tubes. Umbrosa offers a 5-year warranty on all stainless steel. Scratches, superficial corrosion, and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

3-year warranty*

Umbrosa offers a 3-year warranty on all synthetic parts and all galvanized steel parts. Scratches and wear due to use are not covered by this warranty unless the product is structurally weakened as a result.

2-year warranty*

Umbrosa offers a 2-year warranty on granite base, tile base, and mobile concrete base. Scratches, superficial corrosion, and wear due to use are not covered by this warranty. Breakage of the concrete or granite base due to use in case of strong wind is not covered under this warranty. In case of breakage, the new replacement concrete part may show a difference in colour, this is unavoidable. Umbrosa offers a 2-year warranty on all painted parts. Whenever the paint flakes off or forms bubbles, Umbrosa will replace the damaged item, or present a custom solution.

Caution:

Umbrosa uses natural products or materials (wood, concrete, granite, ...) that are susceptible to weather conditions and thus naturally age. The natural ageing process in outdoor conditions is not covered by warranty. Likewise, Umbrosa cannot guarantee that its products will be free from stains due to animal excrement and/or pollution phenomena.

(*) Warranty is only applicable when the Umbrosa products are used under normal wind conditions and when they are thoroughly and regularly maintained as described in the manual under chapter 'do's and don't's'. Direct or indirect damage caused by incorrect use or wrong installation are not covered by the warranty.

WARRANTY

SPECIAL WARRANTY PROVISIONS "FABRICS & TEXTILE PREFABRICATION" :

Extensive research, testing and years of experience have proven fabrics in acrylic to be the best fabric for use on the Umbrosa products.

5 year warranty (except for Ingenua and protection covers) **

All fabrics in all collections, with the explicit exception of the Ingenua collection, a 5-year warranty is offered for discolouration and structural integrity. In the exceptional case of discolouration, Umbrosa will lay out a compensation proposal proportional to the usage period of the product, or a choice will be offered to receive a new canopy whereby the cost for cutting & prefabrication will be charged. Under no circumstances will discolouration result in the free delivery of a new canopy. Burn holes, melted holes, or fabric deformation are therefore not covered by the warranty since these are caused by inappropriate use of the umbrosa products. Daily protection of the umbrella using the protective cover enhances the lifespan of the umbrella exponentially.

2 or 3 year warranty for the Ingenua sails ()**

For no other product is usage intensity as well as exposure to UV so different from user to user. Due to the intensive usage of Ingenua sails, very specific warranty conditions apply to this collection.

The warranty on these sails covers discolouration and structural integrity. For continental Europe, this warranty is 3 years. In the exceptional case of discolouration, Umbrosa will lay out a compensation proposal proportional to the usage period of the product, or a choice will be offered to receive a new canopy whereby the cost for cutting & prefabrication will be charged. Under no circumstances will discolouration result in the free delivery of a new canopy. Outside of continental Europe, the warranty is 2 years. Research does show that the expected lifespan is 5 to 8 years under normal usage, i.e. with daily covering of the sail using the appropriate protective cover and storing it in a dry place.

Special warranty conditions - Zippers

Zippers are very susceptible to correct usage. The risk of breakage increases exponentially in case of inappropriate usage of the zipper. Therefore, study the usage instructions very closely if the selected product has a zipper. If the zipper is stiff, this issue can quickly be resolved using a silicone spray or another lubricant (no oil!).

In case of zipper breakage, Umbrosa can send a replacement zipper.

LEGAL WARRANTY ON PROTECTION COVERS :

Protection covers are covered by the legal warranty.

PRICES AND DIMENSIONS

- Prices are subject to change. The prices are the basis for the discount that applies to you. So please always contact us to be sure you have the most recent pricelist. Do not hesitate to contact us if you would like to receive a specific quotation for larger quantities or for a specific project.
- The dimensions listed in this pricelist may vary with +/-2%, we are not responsible for any discrepancies within this margin. If a dimension is of extreme importance, please do not hesitate to contact Umbrosa to ask for the latest drawing.
- Items not mentioned in this price list are only available under certain conditions. For more details, contact Umbrosa.

NICE TO KNOW

UV rays have an impact on all substances and materials that are used outside. On the one hand we can speak about the 'discolouration' of the fabrics and on the other hand also about 'weakening'. Both can affect life expectancy. In addition, UV rays also have a detrimental effect on people. The UV rays can cause skin irritation, skin aging and skin cancer. To prevent these effects of UV rays, Umbrosa is using high quality fabrics and materials which have a proven colour fastness and offer the necessary protection against the sun. Umbrosa guarantees you products that will bring you years of joy.

(**) Warranty is only valid if the user does not make any changes to the specified sail systems and accessories. Umbrosa products are used under normal wind conditions and are well and regularly maintained. Damage caused by friction or water collection are not covered by the warranty. This must be avoided at all times as described in the manual chapter 'Do's and Don't's'.

WARRANTY

BEAUFORT SCALE

BEAUFORT N°	DESCRIPTION	KM/U	MPH	EFFECTS OBSERVED ON LAND
1	Light air	1-5	1-3	Direction of wind shown by smoke drift.
2	Light breeze	6-11	4-6	Wind felt on face, leaves rustle.
3	Gentle breeze	12-19	7-10	Leaves and small twigs in constant motion, wind extends light flag.
4	Moderate breeze	20-28	11-16	Raises dust and loose paper, small branches are moved.
5	Fresh breeze	29-38	17-21	Small trees in leaf begin to sway, crested wavelets form on inland waters.
6	Strong breeze	39-49	22-27	Large branches in motion, umbrellas used with difficulty.
7	Near gale	50-61	28-33	Whole trees in motion, inconvenience felt in walking against the wind.
8	Gale	62-74	34-40	Breaks twigs of trees.
9	Strong gale	75-88	41-47	Slight structural damage occurs (chimney pots and slate removed).
10	Storm	89-102	48-55	Trees uprooted, considerable structural damage occurs.

PRODUCT STRENGTH ACCORDING TO THE BEAUFORT SCALE*

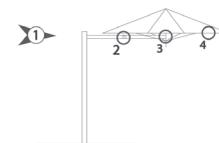

PRODUCT	BFT SCORE	PRODUCT	BFT SCORE
PARAFLEX / PARAFLEX UX	3 - 6	INGENUA	4 - 8
SPECTRA / VERSA UX	4 - 7	ECLIPSUM UX	5 - 6
NANO UX	4 - 7	ICARUS / ICARUS UX	5 - 9
INFINA / INFINA UX	4 - 7		

* The wind scores are valid for a parasol placed on the ground floor. For installation of a parasol on another, higher floor, contact Umbrosa for the best possible solution.

TIPS FOR THE IDEAL WIND POSITION

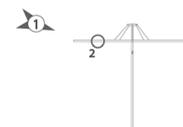

PARAFLEX / PARAFLEX UX

For Paraflex (UX) we advise to position the arm following the direction of the wind (1), completely stretch out the arm (2), place the grip in between the ribs (3), put the umbrella horizontally (4) and on a flat surface.

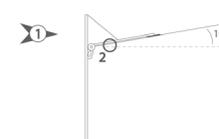

INFINA / INFINA UX

For Infina, we advise to avoid wind from below (1), to put full tension on the canopy and put the umbrella on a flat surface.

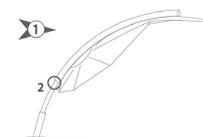

SPECTRA / VERSA UX / NANO UX

For Spectra, Versa UX, Nano UX, we advise to position the umbrella in the direction of the wind (1), put the arm in a 10° angle (2) and put the umbrella on a flat surface.

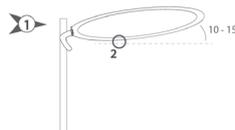

ICARUS / ICARUS UX

For Icarus (UX), we advise to position the umbrella in the direction of the wind (1), put the umbrella in a slight upward position (2) and put it on a flat surface.

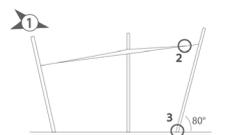

ECLIPSUM UX

For Eclipsium UX, we advise to position the umbrella in the direction of the wind (1), put the circle under a slight angle (2) and put it on a flat surface.

INGENUA

For Ingenua, we advise you to put the sail in a angled position to prevent wind from getting under the sail (1); to put full tension on the sail only by using the Umbrosa ropes and dogbones (2) and to install the poles in a backward position (3).

GENERAL

When closing the umbrella, the strap and protection cover need to be correctly used. Failure in doing so can cause damage, even in a closed position.
